

Blockchain Intelligence Analyst

Podproza is an innovative team of analysts and data scientists dedicated to making blockchain and next gen payments safe and transparent for forward-thinking businesses. Podproza provides strategic insight, data-driven analysis, and valuable peace of mind to leading on-chain innovators. As a Blockchain Intelligence Analyst you will collaborate with a cross-functional team of colleagues to solve fundamental blockchain problems.

Responsibilities:

- Identify, evaluate, collect, and integrate data from diverse sources
- Provide transparency and trust using advanced analysis techniques
- Produce tailored insights and visualizations to help clients make data-driven decisions
- Stay up-to-date on the latest trends and technologies in blockchain and data science

Minimum Qualifications:

- Ability to effectively communicate complex concepts in written and spoken English (Czech language not required but Prague-based candidates preferred)
- Strong analytical skills with practical experience of turning data into actionable insights
- Solid MS Office (Excel, PowerPoint) skills

Preferred Qualifications:

- Bachelor's degree in an applicable field (eg Sciences, Mathematics, IT)
- Experience in blockchain analysis and knowledge of the cryptocurrency ecosystem
- Proficient in SQL, Python, and business intelligence tools
